The Power of Philanthropy

At Northeastern, philanthropy fuels our tremendous momentum so we can continue our innovations apace. We thrive on gifts to support everything from sustaining our groundbreaking centers and institutes to elevating our robust academic programming, from funding global experiences to backing vital research. And our generous donors don't disappoint.

**FISCAL YEAR 2018 TOTAL
FUNDRAISING OF \$74.5 MILLION**

**DONORS HAILED FROM
91 COUNTRIES**

**1,696
STUDENTS**

**25,542
INDIVIDUAL
DONORS**

**3,211
PARENTS**

**18,417
ALUMNI**

**344
STAFF**

**1,660
FRIENDS**

During the past year, our forward-looking donors made gifts that are advancing a number of exciting efforts in engineering, business, science, the humanities, and more.

ROBOT-PROOFING OUR STUDENTS

Northeastern University named its fastest-growing college the Khoury College of Computer and Information Sciences in honor of alumnus and trustee Amin Khoury, DMSB'89. Inspired by Northeastern's leadership in digital innovation, Khoury has endowed the college with \$50 million to support all aspects of the college's future focus.

FOSTERING DISCOVERY

Parents Sami Alsaif and Hend Dabbous, PNT'21, established the Alsaif Family Doctoral Fellowship in the College of Engineering, one of the first ever endowed at the university. Fellow Jennifer Rodowicz studies the effect of the internet of things on smart medical implants, while Vikrant Shah is creating autonomous robots for use in harsh arctic environments.

PUTTING INNOVATION IN MOTION

James Pallotta, MBA'81, and his family gave \$10 million to Northeastern for innovation initiatives they are planning in consultation with President Joseph E. Aoun. Pallotta, who founded the investment firm the Raptor Group and owns a controlling interest in the Italian soccer team A.S. Roma, wants to propel Northeastern's students to the forefront of innovation.

ELEVATING THE HUMANITIES

Ronald Rossetti, DMSB'66, H'06, and his wife, Linda, established the Rossetti Family Program for the Advancement of the Humanities and the Ronald L. and Linda A. Rossetti Chair for the Humanities at the College of Social Sciences and Humanities. The first incumbent, Associate Professor of Philosophy Rory Smead, will inspire STEM students to explore the liberal arts.
